

EXAM ACCESS ARRANGEMENTS POLICY - 2023/24

This policy adheres to and should be applied with due consideration to the College's commitment to the Framework for Ethical Leadership in Education.

This policy is reviewed annually to ensure compliance with current Joint Council for Qualifications (JCQ) regulations.

Mission Statement

Our mission inspired by the Christian tradition is to be a community based on faith, hope and love; developing each individual intellectually, emotionally and spiritually to achieve their full potential.

To achieve this we will:

- Provide a welcoming, supportive community where everyone is valued.
- Provide a high quality, meaningful education which encourages the development of the whole person, inspired by the Notre Dame tradition.
- Promote a caring environment, rooted in the virtues of service, kindness, gratitude and respect.
- Work together for the benefit of each person as well as the wider community.
- Recognise, celebrate and treasure, without exception, the unique gifts and dignity of each person, ensuring equality and fairness for all, as found in the teaching and example of Our Lord Jesus Christ.

Assessor(s)	Christopher Cox
Examination manager	Peggy Damiani

What are access arrangements and reasonable adjustments?

Access arrangements

“Access arrangements are agreed before an assessment. They allow candidates with specific needs, such as special educational needs, disabilities or temporary injuries to access the assessment and show what they know and can do without changing the demands of the assessment. The intention behind an access arrangement is to meet the particular needs of an individual candidate without affecting the integrity of the assessment. Access arrangements are the principal way in which awarding bodies comply with the duty under the Equality Act 2010 to make ‘reasonable adjustments.’”*

(JCQ: Adjustments for Candidates with Disabilities and Learning Difficulties: Access Arrangements and Reasonable Adjustments 1 September 2023 to 31 August 2024, pg.7)

Reasonable adjustments

“The Equality Act 2010 requires an awarding body to make reasonable adjustments where a candidate, who is disabled within the meaning of the Equality Act 2010, would be at a substantial disadvantage in comparison to someone who is not disabled. The awarding body is required to take reasonable steps to overcome that disadvantage. An example would be a Braille paper which would be a reasonable adjustment for a vision impaired candidate who could read Braille. A reasonable adjustment may be unique to that individual and may not be included in the list of available access arrangements. Whether an adjustment will be considered reasonable will depend on a number of factors which will include, but are not limited to:*

- the needs of the disabled candidate.*
- the effectiveness of the adjustment.*
- the cost of the adjustment; and*
- the likely impact of the adjustment upon the candidate and other candidates.*

An adjustment will not be approved if it:

- involves unreasonable costs to the awarding body.*
- involves unreasonable timeframes; or*
- affects the security and integrity of the assessment.*

This is because the adjustment is not ‘reasonable’.

The centre must ensure that approved adjustments can be delivered to candidates”

(JCQ: Adjustments for Candidates with Disabilities and Learning Difficulties: Access Arrangements and Reasonable Adjustments 1 September 2023 to 31 August 2024, pg.7)

Purpose of the policy

The purpose of this policy is to confirm that Notre Dame Catholic Sixth Form College has a written record which clearly shows the centre is complying with its obligation to *“identify, determine and implement appropriate access arrangements and reasonable adjustments”*

(JCQ General Regulations for Approved Centres 1 September 2023 to 31 August 2024, pg.1)

This policy is updated by the Head of Learning Support (HoLS) alongside the individual files of each access arrangements candidate. Each file contains detailed records of all the essential information that is required to be held according to the regulations. From September 2022, students' exam access arrangement files are stored securely in an electronic format, prior to which paper copies were stored securely in the Learning Support Office.

The policy is reviewed annually to ensure that processes are carried out in accordance with the current edition of the JCQ publication “Adjustments for Candidates with Disabilities and Learning Difficulties: Access Arrangements and Reasonable Adjustments” (updated and published annually, at the beginning of each academic year).

Access Arrangements requiring applications using Access Arrangements Online (JCQ)

Some exam access arrangements (EAA) must be applied for, and approval granted using the JCQ Access Arrangements Online portal. These include:

- extra time.
- reader (human reader or electronic reader software);
- scribe / laptop with spelling and grammar checkers enabled / speech recognition technology.
- practical assistant.
- language modifier.

Processing access arrangements requiring awarding body approval

Access Arrangements Online (AAO) is a tool provided by JCQ member awarding bodies for centres to apply for required access arrangement approval for the qualifications listed. This tool also provides the facility to order modified papers for qualifications.

AAO is accessed by logging in to any of the awarding body secure extranet sites.

The HoLS and Specialist Assessor both have AAO accounts and apply for the relevant EAA online, as soon as testing has been carried out and an evidence file to demonstrate a picture of need and normal way of working has been collated.

Evidence files also contain AAO Approval Notices and completed current data protection forms, which *all students must read and sign* permitting the centre to apply for access arrangements on their behalf.

These files are stored securely electronically from 2022/23 and are available for inspection. Files pre-dating 2022/23 are stored securely as hard copies in the Learning Support Department Office.

The Assessment Process

Where exam access arrangements are to be applied for on the grounds of cognition and learning difficulties, an assessment must usually be undertaken by a qualified assessor using current, nationally recognised standardised assessments.

Where exam access arrangements are to be applied for on other grounds (i.e. a medical condition, sensory and physical needs, communication and interaction needs), the HoLS must first gather evidence of the student's qualifying needs, usually an Educational Health Care Plan (EHCP) stipulating this need or medical evidence in the form of a specialist professional report or in writing from a consultant or similarly qualified medical professional (not a GP).

Appointment of assessors of candidates with learning difficulties

At the point an assessor is engaged/employed in the centre, evidence of their qualification is obtained and checked against the current JCQ requirements. This process is carried out prior to the assessor undertaking any assessment of a candidate. Evidence of the assessor's qualification(s) and continuing professional development is held on file for inspection purposes and is available to be presented to the JCQ Centre Inspector by the HoLS.

The qualification of the current assessor

Christopher Cox – Certificate of Psychometric Testing, Assessment and Access Arrangements (CPT3A)

Procedure for the assessment of a candidate's learning difficulties by an assessor: Extra time (25% and 25-50%); Reader / electronic reader software; Scribe / word processor with spelling and grammar checkers enabled / speech recognition technology.

1. Students declare at application/interview/enrolment that they have a support need.
2. Information is gathered from schools regarding students' support needs/normal ways of working as part of their transition to Notre Dame, wherever possible.
3. Students with identified needs have an in-depth interview with a member of the Learning Support team shortly after enrolment, during which a detailed person-centred questionnaire is completed, and support needs are discussed.
4. If a history of significant need is reported or emerges, students' details are placed onto the 'EAA Spread Sheet' and relevant evidence passed to the HoLS/Specialist Assessor. Relevant evidence could be reports from school, previous Form 8s, references, reports from professionals, examples of work or testimony from teachers and candidates own personal testimony (this list is not exhaustive), alongside the detailed interview notes from the Learning Support interview.
5. Where evidence exists of a student having previously received 25% extra time in their exams at school due to "a history of significant and persistent need" and "learning difficulties in his/her first language which have a substantial long-term adverse effect on his/her speed or working" (JCQ criteria), their speed of working is re-assessed at Notre Dame with a view to their previous exam access arrangements continuing. Consideration can be given to "rolling forward" an assessment from a previous exam centre where a strongly established link between Notre Dame and this institution has been forged and upon receipt of the existing Form 8, as well as a copy of the previous assessor's qualification certificate. The aim is for all

students to be re-assessed during their first two terms at Notre Dame and assessments are prioritised depending on the date of the students' first exam series (i.e. First year November examinations, first year January examinations etc.).

In cases where difficulties first emerge after the student has joined Notre Dame, a background history of need meeting the above criteria must be established prior to assessment. This is done through liaison with the student's subject teachers, who are asked to provide copies of unfinished tests, where speed of working difficulties have prevented the student from completing everything required of them, followed by copies of tests where extra time has been trialled in order to measure its impact in "levelling the playing field" and preventing the student from being disadvantaged in relation to their peers.

6. This evidence of picture of need is collated by the HoLS/Specialist Assessor and Part 1 of the Form 8 completed prior to assessment.
7. A Form 8 is not required where the need arises from a medical issue, sensory impairment or physical disability or where the student has an EHCP, nor is it usually necessary to assess a student's speeds of working. A Form 9 will be completed by The HOLS who will collect medical information/evidence from specialists separately in these cases.
8. The student is then assessed by the Specialist Assessor using current editions of nationally standardised tests which are relevant to support the application (tests of reading comprehension speed, writing speed, aspects of cognitive processing).
9. In line with current JCQ regulations, if the student receives two or more scores in the 'below average' range (84 or less) or one "below average" score (84 or less) and at least one "low average" (in the 85-89 range), the results will be recorded in Part 2 of the Form 8 and an application for 25% extra time will be processed using the JCQ Access Arrangements Online portal (AAO). Qualifying scores must be achieved from assessments measuring different areas of speed of working (i.e., reading comprehension speed and writing speed; reading comprehension speed and one area of cognitive processing; two different areas of cognitive processing). Where a student will be using a human or electronic reader in their exams, a below average reading comprehension speed cannot be used for an application for extra time. This is also the case for a below average speed of writing score where the student will be typing and not handwriting their exams
10. Where a student has two or more "low average" scores (in the 85-89 range), relating to different areas of speed of working, but no below average scores, their application for extra time will be rejected by AAO. A special application can then be made to relevant exam boards with additional evidence (i.e., examples of unfinished tests and those where extra time has been allowed, subject teacher testimonies as to the necessity of this allowance in "levelling the playing field").
11. In exceptional cases, a student may receive more than 25% and up to 50% in their exams. Such applications will instantly be rejected by AAO and then considered by exam boards on an individual basis, upon receipt of the following evidence: two or more substantially below average scores (less than 69) from standardised assessments measuring two different areas of speed of working; evidence of "a compelling and substantial picture of need, indicating the candidate's normal way of working".

12. Where a student qualifies for a reader / electronic reader software, details of the nature of their impairment, as evidence of the arrangement being their normal way of working is required and recorded on their Form 8. In most cases, this will include below average scores for assessments measuring reading comprehension speed and/or reading comprehension accuracy.
13. For students requiring a scribe, a word processor with the grammar and spell checkers enabled or speech recognition technology, assessment evidence must relate to their writing. With regard to spelling, they must achieve a standardised score for spelling accuracy which is in the below average range (84 or less) with attempts unrecognisable as the target word. With regard to handwriting, their speed must be in the below average range (84 or less); grammatically incomprehensible to someone not familiar with it; largely illegible to somebody unfamiliar with it
14. Where a student is granted an EAA, their subject teachers are notified, and the information is recorded on the college's MIS system (Cedar).
15. Subject teachers grant the relevant EAA in all class tests and assessments and the Head of Learning Support works alongside the college SLT to ensure that they are granted as appropriate in mock exam series within the centre. In this way, the EAA is established as the student's normal way of working

CENTRE DELEGATED EXAM ACCESS ARRANGEMENTS

Many exam access arrangements do not require an application using AAO and can be granted at the discretion of the College's HOLS. In all cases, current JCQ guidelines are followed, and the relevant supporting evidence is collected and stored securely in the student's exam access arrangement file. The most commonly granted arrangements are listed below, although this list is not exhaustive.

Bilingual dictionary

A bilingual translation dictionary must only be used in examinations by a student whose first language is not English, Irish or Welsh and must reflect their normal way of working. A bilingual translation dictionary must not, however, be used in the following GCE and GCSE examinations: a) English/English Language examinations; b) Irish or Welsh Language examinations; c) Modern Foreign Language examinations testing one of the languages of the dictionary or a similar language, for example a Portuguese dictionary in a Spanish examination.

In a very small number of cases, a student may also be awarded 25% extra time to assist them with their use of a bilingual dictionary. However, they must meet strict criteria, including: be studying on Level 2 courses (or below), as this allowance is no longer permitted once a student has graduated to Level 3 courses; have entered the UK within 3 years of the examination being taken and with no prior knowledge of English; come from a home where English is not one of the languages spoken; need to refer to their bi-lingual dictionary so often that examination time is used for this purpose, delaying the answering of questions; use 25% extra time in addition to their bi-lingual dictionary as their normal way of working. This access arrangement must then be applied for using AAO

Coloured overlay(s)

If using a coloured overlay(s) is the student's normal way of working in lessons, they are permitted to do so in exams. Use of a coloured overlay, in preference to printing examinations on coloured paper, is always given thorough, initial consideration.

Colour naming by invigilator for candidates who are colour blind

This arrangement will not be permitted where the ability to identify specific colours forms part of the assessment objectives. No other information or explanation can be given to the candidate. If the candidate has been using a colour chart, he or she will be permitted to do so in written examinations or practical examinations. Where coloured images are included in a question paper, but do not form part of the assessment objectives and are not specifically testing the candidate's knowledge and understanding of the paper, the question paper may be photocopied onto black and white.

Examination on coloured/enlarged paper

Where evidence exists of students requiring coloured or enlarged exam papers, an assessment of their need has been undertaken and evidence as to normal way of working is stored in the students' exam access arrangement folders, this exam access arrangement is put in place.

Exam reader pen

Where the use of an exam reader pen has been established as a student's normal way of working and evidence of their need is stored on file, this exam access arrangement can be granted.

Fidget items/concentration aids

Where a student uses a fidget toy/item as their normal way of working to aid concentration because they have an ADHD diagnosis – this can be granted as an exam access arrangement by the HOLS.

Language modifier

Where a candidate requires a language modifier for assessed tasks, this is dealt with on an individual basis in accordance with guidance from the Joint Council for Qualifications and through referral to the appropriate awarding bodies. Evidence as to why is stored in the Learning Support files for exam access arrangements

Medical technology

For students who have medical condition such as diabetes, who as their normal way of working use a phone app to monitor their condition- permission to have access to the phone and to take readings using their phone, will be granted by the HOLS when medical evidence such as a Care Plan/Consultants letter is provided, the evidence and the students medical and learning needs will be recorded on a Form 9, and evidence retained in their exam access arrangements file.

Modified exam papers

Where a candidate requires modified exam papers, this is dealt with on an individual basis in accordance with guidance from the Joint Council for Qualifications and through referral to the appropriate awarding bodies. Evidence as to why is stored in their exam access arrangements file.

Noise cancelling headphones/earbuds.

Where a candidate has a sensory impairment or a focus and attention difficulty, they can be permitted to wear ear defenders/noise cancelling ear buds – they cannot however be internet

enabled and can only serve the purpose to reduce sound for the candidate. This must be a candidate's normal way of working in the centre – the HOLS would grant this.

Practical assistant

Where a candidate requires practical assistance for assessed tasks, this is dealt with on an individual basis in accordance with guidance from the Joint Council for Qualifications and through referral to the appropriate awarding bodies. Evidence as to why is stored in their exam access arrangements file.

Prompt

Written evidence confirming the candidate's established persistent difficulties in being able to focus and concentrate and their normal way of working within the centre is stored in their exam access arrangements file.

Read aloud

Written evidence confirming the student's established difficulties in understanding what they have read and their normal way of working within the centre is stored in their exam access arrangements file

Separate invigilation in the centre

Students may be approved separate invigilation within the centre based on a substantial and long-term impairment with an adverse impact and normal way of working. If a student declares an ongoing medical or SEMH need, or one becomes apparent or is diagnosed during their studies at Notre Dame, they will be interviewed by the HOLS to ascertain their specific needs, following which, a decision will be made as to whether separate accommodation is appropriate.

Supervised rest breaks

Supervised rest breaks are awarded for various reasons, including a medical condition, sensory and physical needs, social and emotional health needs, communication and interaction needs and cognition and learning needs. In all cases, there is a requirement for written evidence in which the need for this arrangement is overt (i.e. EHCP, a report from a qualified professional, a letter on NHS headed paper, usually written by a consultant or similar and not a GP). Evidence of need for supervised rest breaks, the candidate's established difficulties and their normal way of working within the centre is stored securely in the student's exam access arrangements file. The HOLS must write an additional file note (Form 9) confirming the need for this arrangement and that it is the student's normal way of working.

Word processor

Where a student uses a word processor / laptop, with the spelling and grammar checkers switched off, their reason for doing so must be compliant with the exam centres Word Processor Policy (see appendix 1). Evidence of this, as well as it being their normal way of working, is stored in their exam access arrangements file.

EXAMS ACCESS ARRANGEMENTS: WORD PROCESSOR POLICY

This policy adheres to and should be applied with due consideration to the College's commitment to the Framework for Ethical Leadership in Education.

Mission Statement

Our mission inspired by the Christian tradition is to be a community based on faith, hope and love; developing each individual intellectually, emotionally and spiritually to achieve their full potential.

To achieve this we will:

- Provide a welcoming, supportive community where everyone is valued.
- Provide a high quality, meaningful education which encourages the development of the whole person, inspired by the Notre Dame tradition.
- Promote a caring environment, rooted in the virtues of service, kindness, gratitude and respect.
- Work together for the benefit of each person as well as the wider community.
- Recognise, celebrate and treasure, without exception, the unique gifts and dignity of each person, ensuring equality and fairness for all, as found in the teaching and example of Our Lord Jesus Christ.

Approved by Curriculum & Standards Committee	February 2023
Review interval	2 Years
Previous review date	November 2021
Policy to be reviewed by or before	September 2024

Appendix 1 – Word Processor Policy

The College is allowed to provide a word processor with the spelling and grammar check facility/predictive text disabled (switched off) to a candidate **where it is their normal way of working within the centre and is appropriate to their needs**. (This also extends to the use of electronic brailers and tablets.)

The use of word processors in controlled assessment or coursework components will be considered standard practice unless prohibited by the specification.

It is permissible for a candidate using a word processor in an examination to type certain answers to questions, i.e. those requiring extended writing, and handwrite shorter answers. Examinations which require numeric, symbolic or shorter answers are often easier to handwrite within the answer booklet i.e. maths and some science papers. The candidate thus avoids the difficulty of visually tracking between the question paper and screen.

Determining the need for word processor use

The candidate will only be permitted to use a word processor in examinations if this is their normal way of working at college in extended writing tasks and is appropriate to their needs.

The use of a word processor will not simply be granted to a candidate because he/she prefers to type rather than write or because he/she uses a laptop at home; there has to be **significant** grounds for the awarding of this arrangement.

The Learning Support HoD and/or the Specialist Assessor will assess the need for word processor use within college and in examinations and will use the following as indicators:

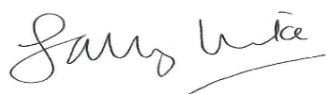

- a learning difficulty which has a **substantial and long term adverse effect** on their ability to write legibly*
- a medical condition
- a physical disability
- a sensory impairment
- significant planning and organisational problems when writing by hand, usually as a result of an identified learning difficulty*
- illegible (not *just* untidy)/very slow handwriting*

*this will usually have been picked up by school, thus GCSEs and other prior qualifications will have been completed on a word processor.

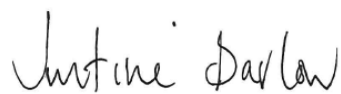

This list is not exhaustive and does not include provision for emergency situations during exam periods.

As with all exam access arrangements, the Learning Support team are required to assess need i.e. by using standardised assessments or collecting medical advice, and build up a file of evidence which demonstrates the ongoing picture of **significant, long term** need to evidence the arrangement.

Learning Support has a limited number of laptops which may be available to loan out to students on a daily return basis but we encourage them to use the PCs provided in classrooms wherever possible.
